

# Pella Regional Health Center Building Addition 2006 Fact Sheet

Groundbreaking Date:  
Expected Completion Date:

October 12, 2006  
Early 2010

Square Footage:

105378 new  
7740 remodeled

## Highlighted Features:

The brand new **Medical/Surgical Hospital Floor** will include:

- Private rooms with private bathrooms--research shows that patients in private rooms have fewer falls, fewer medication errors and quicker recoveries
- A family area in each room that includes a pull-out sleeper bed and internet access to keep in touch with work and family
- An improved location--immediate access to Pella Medical Clinic and Medical Imaging
- A new design that keeps nurses closer to patients--with patient supplies and information nearby

*All designed to be a more pleasant environment that will give each patient more privacy and independent control of their environments while in the hospital.*

The new **Medical Imaging and Emergency Departments** will include:

- Merging of all Medical Imaging services into one area that is easily accessed by both the Emergency/Urgent Care Departments and the Hospital Floor
- A new canopied drop-off area and improved ambulance garage
- Central workstation to increase the quality of care for all patients
- A quieter, more private infusion center for cancer patients

*All designed to provide increased privacy during stressful situations and provide faster, more efficient care during emergencies.*

The redesigned and renovated **Surgery Department** will include:

- A private consultation room for surgeons and families
- Two new Endoscopy Suites
- Redesigned pre-op and post-op accommodations

*All designed to provide more patient privacy and higher quality care.*

A second story for **Pella Medical Clinic** to keep up with demand for services and growth in both primary care and specialties

*The Medical Clinic's new floor will have immediate access to the new Medical/Surgical Hospital Floor.*

Anticipated Cost:

\$40 million  
Including equipment and furnishings
